CLARESHOLM LOCAL NEWS

Third avenue is being improved this week by a new cement walk.

Miss Hattie Guy is spending her holidays with friends at Portland, Oregon.

Leonard, 8 year old son of Mr. and Mrs. O. T. Lundgard, died on August 5th.

E. H. Mack has returned from his vacation and is again on duty at the C. P. R. station.

Misses Muriel and Dorothy Peck, of Edmonton, are visiting relatives and friends here this week.

A heavy rain set in this morning, which has effectively put a stop to all harvesting operations for the time being.

Tourist traffic has been very heavy of late. Cars from many states and from nearly every province have been passing through daily.

Frank Teters has returned to Clareholm after spending a year or so at Fernie. He is holding down his old position at the Qually & Yokum garage.

If you have read "The Hoosier Schoolmaster" you will want to see it on the screen. At the Rex theater on Friday and Saturday nights this week.

The Rev. Geo. and Mrs. Weber left on Thursday on a vacation trip to Calgary and Banff. The last days of the month will be spent at the United Church Summer School of Religion being held in Mount Royal College.

Forest fires in British Columbia, Montana, Idaho and Washington have filled the air with smoke this week. Much valuable timber has been destroyed. Most of the fires are reported to have been started by lightning.

Harvest is in full swing in this district now. The weather for the week has been favorable for cutting. There was a light shower early Monday morning, but it did not interfere seriously with cutting. While it will take the threshing returns to tell the story it is predicted that the yield in this district will exceed last year's yield.

The second summer reunion of the ex-students of the Clareholm School of Agriculture was held at the school on last Friday. About one hundred of the old boys and girls were in attendance and represented all districts of southern Alberta. The unusually early commencement of harvest prevented many others from being present. Inspection of experimental plots, athletic events and a baseball game constituted the afternoon program. The dance in the evening was well attended, there being about 150 couples present.

United Church Services

The union services of St. Andrew's and Bethel United churches will be continued next Sunday with the Rev. G. W. Langille in charge. The morning service at 11 o'clock will be held in St. Andrew's church and the evening service at 7:30 in Bethel church. Brief, bright, and attractive services, with practical Gospel messages at each service. A hearty welcome for all.

Nazarene Church Announcements

Friday, 8 p.m., Young People's meeting. Miss Annie Guttie speaker.

Saturday, 8:30 p.m., the Prayer Band will meet at the church.

Sunday, 10:30, holiness meeting. Subject, "Seeing God."

3 p.m., Chester Laing at Greenbank school.

Sunday night 7:30, a great evangelistic meeting; subject, "The Power of Choice."

Card of Thanks

Mr. and Mrs. O. T. Lundgard wish to express their sincere thanks to all who extended sympathy and assistance in their time of sorrow.

Canadian Pacific Crop Report

Winnipeg, Aug. 10.—Extremely warm weather prevailed over the prairie provinces during the past week and showers were fairly general over Manitoba, Saskatchewan and central and northern Alberta, according to the weekly crop report issued by the agricultural department of the Canadian Pacific Railway. While rust is prevalent in parts of Manitoba and Saskatchewan no serious damage is reported and grain is well advanced. Later sown grain however may be somewhat affected. Generally speaking, conditions show an improvement over last week.

High temperatures prevailed in Manitoba during the early part of the week and the extremely warm weather brought on earlier storms. Such districts suffered hail damage and at Snowflake on the night of the 5th three thousand acres were badly damaged. Cutting of wheat, barley and rye is now general with threshing started in some places. The wheat crop gives evidence of being better than average yield for the province.

Apart from some scattered showers in northern sections of Alberta, weather has continued hot and dry, but the crops under these conditions are holding up wonderfully. Territory between Calgary and Macleod and including Cardston sub-division gives promise of excellent yield. From Calgary to Red Deer conditions are almost as good. Between Medicine Hat and Saskatchewan boundary the crop has further deteriorated on account of drought and will be extremely light. Such applies as well to dry areas east of Brooks, Taber and Foremost.

Root crops and early apples are moving in steady volume in British Columbia but rain is urgently needed over the whole province to develop both fruit and root crop.

Turnover in New Brunswick

St. John, N. B., Aug. 11.—The defeat of the Veniot government was accomplished yesterday by the electors of New Brunswick. This morning finds 36 of the 48 seats in the legislature in the Conservatives, led by Hon. Dr. J. B. Macleod, the present government holding the remaining 12. When the house dissolved three weeks ago, the government had 29 seats, the opposition 12 and the farmers seven. The farmers, as a result of yesterday's voting, passed out of the political picture, the only candidates they had being defeated.

Largest Butter Eaters

Canadians are becoming the champion butter eaters of the world. Twenty-eight pounds of butter each for every man, woman and child in the Dominion was consumed last year, a report issued by the bureau of statistics shows. Total consumption of butter in 1924 was 254,203,762 pounds. This is an increase of 4,000,000 pounds over the 1921 consumption. Total production was 286,600,000 pounds, compared with 277,480,207 pounds the year before. Exports amounted to 22,343,039 pounds, an increase of 9,000,000 pounds over the 1923 exportation.

U. S. Dope Ring Exposed

Chicago, Aug. 11.—Col. Will Gray Beach, chief of the narcotic division of the internal revenue department for the Chicago district, and three of his trusted assistants have been arrested on charges of bartering drugs for the lost robbers.

In Beach's apartment were uncovered stolen goods worth thousands of dollars. Chief Irey said: "It's the biggest exposure of a dope ring ever made in the United States. Chicago has been the source of supply for the entire country. All the big men in the dope industry have their headquarters here. The stuff is brought into the country from Canada and Mexico."

Don't Get Sunburned

A light application of Nyal Face Cream before exposure will effectively prevent sunburn, tan and skin irritation. This delightfully refreshing cream also soothes and heals inflamed skin, dries in quickly leaving no trace and makes face powder adhere better.

An Empire Problem

Conditions throughout Canada have been steadily improving for several months past and present prospects are for a continuance of that most desirable state of affairs. Industrial activity is increasing and the number of unemployed is smaller than for some years, and the prospective harvest gives promise of requiring the labor of every available man, and that the railways will be busy and fully staffed throughout the Fall and Winter months in handling the resultant traffic. Manufacturing is still rather slow because people have learned from past bitter experience not to count their chickens before they are hatched. Manufacturers are, however, gradually increasing their output in anticipation of substantially increased business.

The general upward trend is indicated by an increase of five million dollars in the first six months of the year in the construction of new residences and of four million dollars in industrial buildings. Prompt payment of taxes and of mortgage loans, both as to principal and interest, are other signs of the betterment taking place.

There is less talk of Bolshevism and advocacy of half-baked Communist theories and a more general appreciation of the fact that in this age, as in all past ages, only by and through the work of each individual and the community as a whole, can problems be solved and progress and prosperity be achieved.

The desire for a larger life of immunities, especially from the British Empire, is still held in many quarters based on the new well accepted belief that one of Canada's greatest needs is population. But while the outlook is promising in Canada, it is not so in Great Britain. Ordinarily, it would be thought, that this would result in a larger immigration which is desired, but, actually, the reverse is true.

During the war when it became vital to the Empire's security and the winning of the war to speed up production to the maximum, notwithstanding the absence of millions of men under arms, improved machinery and labor saving devices and methods of all kinds came into practical use, with the result that production was enormously increased. Today a large volume of production can be maintained with a smaller working force. In June last, unemployment in the British Isles numbered 1,251,000, or more than a quarter of a million more than in June, 1924. When the families dependent on these men are taken into consideration, it can be seen that what a large percentage of the people are without a fixed means of livelihood.

To meet this situation a system of doles was established and has been in effect for some years now. The unfortunate effect has been that working men, thousands of people are now content to live in idleness on these doles rather than accept work when it is offered, while those who are working, and paying heavy taxes to provide these doles, are asking why they should labor to support those who are in idleness. In a word, the dole system is breaking the morale of the people.

Observers and close students of conditions in Britain find that this dole system is distracting thousands from immigrating. They prefer to accept the dole, and do nothing, rather than face the possibilities in a new land and the absolute necessity of hard work under new and untried conditions.

Great Britain is overpopulated and becoming more so. There is not work for all and no present prospect of it. Industry is hindered in carrying larger staffs of employees now than are actually needed, and, faced with active competition from other countries, and carrying a huge burden of war debt, the outlook is not bright. Unfortunately, too, owing to this lowered morale, a percentage of those who do immigrate do not display the necessary stamina to succeed here and write letters home depicting conditions here as worse than in Britain and stating they wished they had not emigrated.

And all the while Canada needs population and is in the desire of our people that it shall be, so far as possible, British-Born. It importing severe restrictions on the entry of people from other lands, while waiting and hoping for the British people who will not venture, but prefer to live at home and live on doles which sooner or later must cut out or bankrupt the country.

It is a real problem, Canada does not want idlers and will not welcome them. The Dominion requires workers, and to those able and willing to work a cordial reception will be extended and for them there is every prospect of success. In fact it is essential to the extent that anything can be assured. But this country will never establish a dole system. The unfortunate through sickness or accident will be cared for, but the L.W.M.s, no matter what their nationality, will not be tolerated and will have to strive for themselves as if they came to this country.

The World's Oldest Bush

According to Dr. Edgar A. Mearns, a box huckleberry bush in Perry County, Pa., is the oldest bush in the world. This remarkable bush, Dr. Mearns says, is a huckleberry of the entire side of a hill. Dr. Mearns estimates that it grows six inches a year. Taking that as a basis, the plant must be something like 12,000 years old.

Ship Baby Chicks

More than 11,000 baby chicks were shipped out this spring from the hatcheries of the provincial poultry plant at Oliver, Alberta. They were shipped as far north as Bertha and as far south as Lethbridge.

England's Curio King Dead

Aged Auctioneer Had Handled Many Higher Prices

Mr. Henry Stevens, of Stevens Auction Rooms, King Street, Covent Garden, London, who was probably the oldest practicing auctioneer in England, died at Addlestone, Surrey, at the age of eighty-two.

President Kruger's hat and King Charles' waistcoat were among the many curiosities that came under his hammer.

Mr. Stevens had sold every conceivable thing in his time, from an elephant to an auk's egg and a mummy. He sold the late Lord Derby's great menagerie of more than 1,600 animals and birds, the death mask of Napoleon, a piece of Queen Victoria's wedding cake, the spear that killed General Gordon, and one of Dick Turpin's pistols.

He sold twenty-four out of the known seven-five aunts' eggs in the world, one of these fetching £450.

As a child, Mr. Stevens saw the Duke of Wellington's funeral passing along the Strand on his way to St. Paul's, and he often saw Dickens and Thackeray, who would visit the auction rooms on their way to the Garrick Club.

WORRIES IN THE HOME

It is These That Cause Many a Breakdown in Health

Almost every woman of the head of a household is troubled by little worries that are not only annoying but also harmful to her health. These little worries, if not brought under control, will break down the health of so many women. In nervous headaches, backache, indigestion, pains in the side or back and a whole host of other ailments that are the result of these little worries. To those afflicted in this way, Dr. Williams' Pink Pills are the only remedy. They purify the blood, bring freely to the surface the impurities that are the cause of these troubles. The women who have tested and proved the value of this medicine is Mrs. Gustave A. Brantley, Minn., who says: "It is with profound thankfulness that I tell you what Dr. Williams' Pink Pills have done for me. I was a nervous, irritable, and weak, and my blood thin and pale. I was so ill that I looked like a skeleton. I had a whole host of other ailments, such as nervous headaches and indigestion, that were the result of these little worries. I decided to try Dr. Williams' Pink Pills and I soon found that they were just what I needed. Under their influence, my nervous system, my blood, my side, my back, and my whole body were restored to health. I am now a perfectly healthy woman, and there is no doubt that it is due to the use of Dr. Williams' Pink Pills, a supply of which I now always keep in the house, and I would advise every woman to do the same."

You can get these pills through any dealer in medicine, or by mail at 50 cents a box. Write to Dr. Williams' Medicine Co., Brockville, Ont.

An Interesting Ceremony

Unveil Calgary Cabin Commemorating Arrival of R.N.W.M.P. in 1876

The jubilee celebration of the founding of the city of Calgary on the arrival of the Royal Northwest Mounted Police, was marked by an unveiling ceremony of a cabin in Central Park. It commemorated the arrival of F. Thompson, a Mounted Police officer, who was the first to set foot in the city, in August, 1876. The veil was taken away by Sir Cecil Denny, and it was drawn by the Hon. J. H. McCreery, B.C., representing the historic site and monuments board of Canada in the city.

"Good birth is as greatly to be desired by a community as by an individual, and no city has a better birth than Calgary, founded by the Royal Northwest Mounted Police," he said.

Minard's Liniment for Neuritis

Fewer Canadians Going to U.S.

As a result of the immigration of Canadians to the United States is indicated by figures in the annual report of the United States Immigration Commissioner of the Montreal district. Residents of Canada entering the United States for permanent residence during the last year ended June 30, 1925, at border points from Halifax to Cape Vincent, N.Y., totalled 19,047, as against 77,424 for the last year. Eighty per cent. of the 19,047 were Canadians.

A butcher in a certain town had read considerable about Minard's Liniment for Neuritis, and was anxious to keep up with the times, he placed this sign in his window: "Purchased from Minard's Liniment for Neuritis."

Investigate Western Oil Fields

Giant Oil Corporation Will Look Into the Possibilities

The Royal Dutch Shell Company, one of the giant oil companies of the world, has decided to investigate the development possibilities in western Canada, with a view to entering the field.

John Moore, geologist, representing Dr. W. Van Holst Pellekaan, the chief geologist of the Royal Dutch Shell Company's various corporations in the United States, is in Calgary to make a thorough investigation. Mr. Moore made no secret of the fact that the company's interest has been aroused by the marvelous naptha gusher in the Turner Valley field, known as Rosedale No. 4. He said he knew of no other well on the continent like it, judging from reports.

First Man Swims Thames Estuary

Covers Course of Thirteen Miles in Five Hours

Starting on the Kent side, Mr. Norman Derham, of South-on-Sea, succeeded in swimming across the Thames Estuary at his third attempt.

A week previous he was obliged to give up owing to cramp when two miles from the Kent coast.

The distance across the estuary where he crossed is seven miles, but during his swim he covered a distance of 13 miles in five hours and ten minutes.

Mr. Derham's feat has never before been accomplished.

Cold on the Chest

Best Treated This Way

When the throat is sore, and the chest is tight and full of congestion, something strong enough to penetrate the tissues must be applied quickly. To get the quickest results, use Dr. Williams' Pink Pills for Pale People. It won't burn or blister, but it will draw out the inflammation and soothe your cold and make you well in a short time. No other remedy is so potent, so strong, so quick to bring relief, as this "Pink Pills for Pale People." Nearly eight years in the world, it has been tried by millions throughout the world in over 250 bottles.

Wonderful Air Mail Service

New York to San Francisco in Less Than Two Days

One of the most wonderful things in the world is the United States air mail service. It has its equal nowhere for distance flown and service rendered. The percentage of fatal accidents in six years of operation has been negligible. Between May 15, 1919, and June 26, 1924, 255,068,000 letters were carried. The number of passengers carried was 6,871,453. Between May 15, 1919, and June 26, 1924, 14,981 trips were made in storm and fog. Average operating efficiency was 91.45 per cent. for the six years. With the putting on of the transcontinental service New York to San Francisco, on July 1, 1924, there was a gain in efficiency.

The elapsed time of flight is between thirty-two and thirty-three hours. National time record is ninety-two to 120 hours. The average mail used to take twenty-eight days to cross the continent. This was reduced to nine days by express. The best time made by mail trains was eighty-seven hours. Most people have forgotten that avarice is rocking and across the deserts from New York to San Francisco all through the year but the wonder of it is not lost to those who see the planes rush into the air and speed on their way. In the hour they are passing in the light overhead and witness the end of the long journey completed in so short a time.

CLARESHOLM, ALTA.

Free Insulin

Free insulin supplies will be
provided by the Alberta
department of health in cases
where the patients are not able to
otherwise secure them. Hon.
George Hoodley, minister of
health, announces this as a new
government policy to be admin-
istered through that department.
The minister's attention to the
matter was invited a short time
ago by the editor of the Hanna
Herald, who reported a number

of cases in need of treatment but
unable to meet the cost. It has
been decided to provide insu-
lin for all such cases making
application, and supplies will be
sent out from the health depart-
ment in Edmonton. Each applica-
tion will be received and dealt
with on its merits and necessary
investigation as to medical diag-
nosis and financial circumstance
will be made before issuing sup-
plies. Alberta will in this way
be adopting a similar course to
that already taken by the provin-
ce of Ontario.

DEPARTMENT OF THE

PUBLIC NOTICE—Under the
provisions of Section 85 of the
regulations governing Dominion
Forest Reserves, the Minister of
the Interior has authorized the
prohibition until further notice of
all fishing in the following waters
in the Rocky Mountain Forest
Reserve—

1. Shunda Creek and its tributaries,
within the Clearwater Forest
Reserve.
2. All streams within the Bow
River Forest, except the main
streams of the Red Deer, El-
bow and Highwood Rivers.
3. All streams within the Crowns-
nest Forest, except the main
streams of the Oldman, Living-
stone, Carbonade and Cas-
tle Rivers, the west branch of
the Castle River, and the Rock-
horse Creek from the forks
eastward.

W. W. CORY,
Deputy Minister of the Interior
Ottawa, February 23rd, 1925.

Here and There

Since the first of April up to the
present time approximately seven
million pounds of various fish have
been landed at North Sydney, N.S.,
by local fishermen. The catch made
so far this season is far in excess
of any previous year's catch in the
history of this port.

All tourist and motorist records
are being broken at Banff this year.
There are three times as many
cameras as in any other year and
2,000 more bathers than in 1924.
The Canadian Pacific hotel here
and at Lake Louise reports bookings
as being unusually heavy.

More Alberta provincial savings
certificates were sold in the first
six months of this year than in any
full year previously, even including
the big record year of 1920. Since
the beginning of the current year up
to the end of June, the total sales
amounted to \$1,041,000. There is
now close to \$7,000,000 outstanding
in savings certificates.

Bella receiving licenses held in
Canada at the end of last month
numbered 56,085, according to a
statement issued by the Federal
Government. Ontario leads all
provinces with a total of 28,507.
Quebec occupied second place with
7,882 licenses, followed by Saskat-
chewan with 6,551; Manitoba, 4,441;
British Columbia, 3,322; Alberta,
3,004; New Scotia, 1,435; New
Brunswick, 735; Prince Edward
Island, 87; Yukon, 22; and North-
west Territories, 5.

A consignment of 31 fox hounds
from the famous Mendip Hunt
Pack, in Somerset, England, was
brought to Canada early in August
by the Dominion Express Company
for the Toronto Hunt Club. The
English papers published photo-
graphs of these splendid animals
and expressed gratification that
good British hounds were being used
on the hunting fields of Ontario.
This is the third such consignment
brought out by the Dominion Ex-
press within recent weeks.

cept classified advertising for the
Calgary Alberta.

"The Bread Basket of the Country"

Upper-Mixed farming scene in Sas-
katchewan.
Left—Sheep on a mixed farm in Alberta.
Centre—The Canadian Pacific Hotel
Park, at Strathmore.
Right—Three wheat in a wheat farmer
who has won the wheat of Canada at
the world's stock to supply the needs of
the household.

That the history of the agricultural
advances in the north-western
regions of the United States is full
of significance for the farmers of
western Canada is shown in an
article by Marquis James in a re-
cent edition of the "New York
Times". In 1871, 1918 and 1919,
writes Mr. James, there were in the
Dakotas, Montana and Minnesota,
three complete crop failures in suc-
cession which had deplorable eco-
nomic effects and produced some-
thing like a panic in the three states
primarily concerned. But, continues
the writer, this misfortune had one
desirable result in that it pointed out
to the farmers themselves and to the
country at large the value of mixed
farming, as compared with the
crop methods which had obtained up
to that time. The depression demon-
strated the necessity for a change in
farming methods. And in adopting a
policy of more extensive and intensive
general or diversified farming,
Mr. James believes that the North-
western States solved their problems.

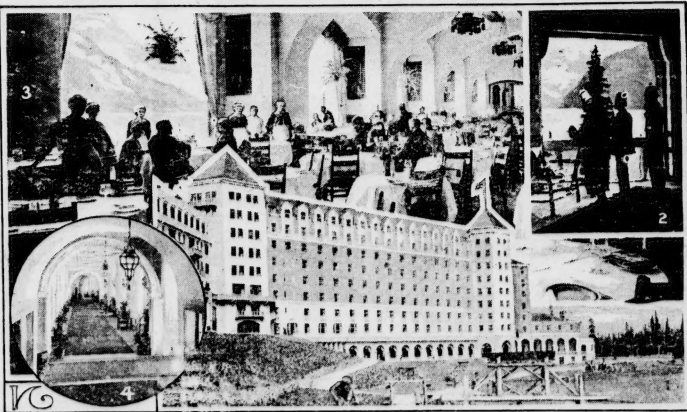

For a time, says Mr. James, prior
to the large successive failures, the
wheat growers enjoyed a period of
uninterrupted prosperity. They were
wheat growers, not all of them were
farmers, but an official survey
by callings of the inhabitants of the
branch country, he finds in one
township, cobblers, bookkeepers,
bar-tenders, a school-teacher, Y.M.C.A.
secretaries, dentists, motemen and
soda-water dispensers—not pursuing
their regular vocations, but farm-
ing, or, perhaps, it is better to say,
growing wheat. They were making
money, too, because from 1912 to
1916 there was a phenomenal rain
fall in that western section and the
wheat yields were astonishing.

People thought this would last for-
ever. They even thought the rain
fall would last. The story one hears
is so many new countries were re-
peated and believed that the "break-
ing" and cultivation of the native
soil works a permanent increase in
the precipitation. Government work-
ers or records fail to support this con-
tention. But this and many other
things were lost sight of in the hey-
days of the boom in the United States
Middle West. Land values soared.
Everybody had money. Credit was
too free. Over expansion followed.
Then descended the three crop
failures in a row—1917, 1918 and
1919. The previously ample rain
fall dropped off and the 100-day
farming methods were not equal to
the occasion. The country was in a
disperate fix. Banks had to lend
more money after each failure to en-
able the farmer to put in another
crop in the hope that the proceed-
ings would cover earlier, as well as
current loans. The crop of 1920 also
failed. Thousands of settlers left
and one bank in every three in Iowa
failed.

The same situation existed in
modified form over the Dakotas and
Minnesota, but for other localities
had reserves to fall back on.

It is easy to be wise after the
event and the moral to the above
is that there has been a turnover
not only in farming methods but in
farmers. The 100-day wheat farmer
—the dentists and soda clerks—have
largely given place to agriculturists
of the 365-day a year variety. Wheat
is still the main money crop, but it
is grown scientifically. Land is sum-
mer-fallowed and worked before and
after planting. Wheat acreages are
everywhere diminishing and crops
are rotated and diversified. Rye,
millet, alfalfa and flax have been in-
troduced; dairy and beef herds estab-
lished; poultry, bees and vegetable
gardens cultivated. Now, when
wheat fails, as it sometimes must,
there is something else to fall back
upon. This lesson has not been lost
in Canada. Farmers of the Cana-
dian West who are succeeding are
in most cases doing so because they
have learned the sound economic
value of diversified farming as
compared to the one-crop method.

"I Dreamt That I Dwelt in Marble Halls"

- (1) The Chateau Lake Louise.
 - (2) The Patio and Big Terrace.
 - (3) A section of the Dining-room.
 - (4) The Lounge leading to the Dining-room.
- This new nine-story hotel, occupying the ground space of an entire
city block, was taken over from the contractors two weeks before
its opening on June 1, by the Canadian Pacific Railway. It is the new
Chateau Lake Louise, built last winter at a cost of two million dollars
on the banks of the famous Lake Louise, 6,500 feet up in the Canadian
Rockies.
- To equip this new hotel and stock it with food for guest occupancy
on June 1, 800 beds, 320 chairs, 200 tables, 300 pieces of furniture,
200 desks for rooms, with sheets and pillow cases, but bed linings and
other equipment to match, had to be transported three and a half miles
up a narrow-gauge mountain railway. The portable kitchen, which had
to be stocked in the hotel the day before opening, included 11,000 pounds
of turkey, 5,000 pounds of roast beef, 18 whole lambs, 12 whole pigs,
1,000 pounds of new cabbage, 40 cases of grape fruit, and 20 cases of
fresh spinach. Approximately 2,000 pounds of butter and 1,000 pounds
Canadian Pacific supply farms at Strathmore, Alberta, and placed in
refrigerators.
- Of the other foodstuffs, five tons of potatoes, 200 sacks of flour, 20
tons of sugar, 3,000 pounds of butter, one ton of tea and a thousand
pounds of fresh coffee had to be placed in the hotel.
- It is a special train of eight cars, carrying 250 tons of food-
stuffs, was required to open this remarkable edifice and all of this had
to be taken in at the lake content, for at the opening banquet the new
living rooms were almost full.
- The hotel is a magnificent building of 125 rooms and women, including three managers, had to
be on hand a week before its opening. These employees have a building
to themselves equipped with rooms with bath, hot and cold running
water, a restaurant and a ballroom.
- The new Chateau Lake Louise has 400 rooms with bath, all outside
rooms, 210 of them with southern exposure facing the famous lake. There
are telegraph and cable offices in the restaurant, and each bedroom con-
tains a phone which can be contacted with long distance.
- A resident doctor and trained nurse will have offices in the building
to look after the health of its guests and a special dining room has been
built for the maids, nurses and younger children of the guests.
- Chateau Lake Louise is now said to be the largest and most modern
equipped chalet in the world.

WORLD HAPPENINGS
BRIEFLY TOLD

It is rumored that the Ontario Government is considering an increase in dues on timber cut in the north.

The national research council at Ottawa announced that A. B. Meloy, of the University of Toronto, has been awarded one of three fellowships having a value of \$1,200.

C. J. O'Neil Smith, former Canadian superintendent of emigration in London, has sailed for Canada. Col. Smith intends spending several months in the Dominion.

Right Hon. Austen Chamberlain, the foreign secretary, announced in the House of Commons that the British Government does not propose to send troops to Tangier, Morocco.

For the first time in eleven years, Toronto, Ont., during the month of June was free from motor fatalities. Since 1911, 42 persons were killed by automobiles during the month of June, seven in 1922 and seven in 1923.

According to immigration officials at Niagara Falls, Ont., 31 Canadians returned from the United States during June. In addition, there were 71 other nationalities who had returned to Canada. There were 156 rejections.

Hon. Dr. Forbes Godfrey, minister of health, has returned to Toronto from Geneva, where he attended the world congress being held by Henri Spallinger with his tuberculosis serum. He says he was much impressed.

Prediction that England will be driven to nationalization of the coal mines "in order to save the mining industry" was made at the annual conference of the Mining Federation at Scarborough.

The Prince of Wales played the part of a heroic fireman at Kilmarnock, when he assisted settlers in extinguishing a fire in a native wood and grass children's house at the Pacific agricultural show. All of the children were rescued.

Urge Marines To Revolt

Red Propaganda Directed At British Fleet Visiting Norway

The arrival of a British fleet for a visit to Oslo was marked by intensive demonstration by Norwegian communists. Secret agents were made to the blackboards and the marines.

"Rise in revolt rather than obey your government if you are ordered to make war on the British fleet," a message drafted in the face of the British fleet by local communists.

The appearance of the inflammatory propaganda directed at the British fleet visiting Norway was resented deeply by the Norse Government as well as the British officials of the fleet. Russia has objected to the presence of a British fleet in northern waters and this propaganda is taken to have been inspired by Moscow.

Victim Of X-Ray Research

English Doctor Forced To Give Up Practice Is Dangerously Ill

Dr. T. H. Sondergaard, of Weymouth, an X-ray martyr, has had to give up practice and go into a London nursing home for an operation in which his life is at stake.

Throughout nearly the whole of his professional life, Dr. Wells has been handicapped by injury he received in the early days of his career in experimental X-ray research, by which he was badly burned in the leg.

Dr. Wells is one of the best-known surgeons in this part of the country, but few have known of the intense pain and crippling disability which he suffered in recent years.

Constantinople Hears U.S. Signals

Clear transmission of signals to Constantinople, a distance of more than 5,200 miles, is the latest accomplishment of a short wave radio set with which the navy department is experimenting at Lakehurst, N.J.

The set previously had been heard at Honolulu about 5,000 miles distant.

Was Well Helped

Mother: Were you good at the party?

Mother: Yes, I did. I asked her anything at the table?

Son: Yes, I did. I didn't. I asked her, and they didn't hear. I helped her out.

Thirty employees are constantly engaged in dusting the 2,000,000 miles library in the British Museum.

South Africa has recently provided special air-mail postage stamps for use in the new Capetown to Durban service.

White slacks, seaweed jelly and slacks' dice were among the delicious served at a recent luncheon of the Paris Zoological Society.

W. N. U. 1556

Settlers Build Their First Home

European settlers building their first home on the lands of the British Dominion Land Settlement Corporation, north of Vermilion, Alberta.

Remarkable Land Settlement Plan

Influential British Company to Assist Settlers and Promote Colonization. The Vermilion district in central Alberta is this summer the scene of a remarkable and most promising development in land settlement. The undertaking referred to is that of the British Dominion Land Settlement Corporation Limited, a powerful financial organization formed in London, England, for the express purpose, as its name implies, of promoting land colonization in the Overseas British Dominions and particularly in that of the British Dominion of Alberta.

The high character of the company is indicated by the personnel of its British directorate, which includes: The Duke of Sutherland, chairman; Sir Arthur Griffith Boscawen, formerly minister of agriculture in the British cabinet; Sir Edward Maxwell, chairman of the Great Indian Motor Car organization; Sir Robert Lyne, M.P.; Col. A. G. Connell, O.B.E.; and Mr. Mervyn Brown. These names in themselves, make a guarantee of the standing of an organization which has for its object the use of British capital in assisting to develop and people the vast spaces of the empire—an idea which has set the mind of the British people especially during the war.

The Canadian board of the corporation is constituted as follows: Mr. Mervyn Brown, chairman; Mr. Robert McKelvey, A.L.M., of Kilmarnock; Mr. W. H. Carter, of Carter, Hall & Aldinger, Winnipeg; Mr. W. P. Dutton, Winnipeg; and Mr. Isaac Pichardo, K.C., as special counsel. Mr. W. P. Dutton is general manager. To be accurate, the British Dominion Corporation sells its land at fair prices and on fifteen-year terms, with no cash for three years except the taxes, the principal to be discharged during the remaining twenty years of the period. Besides giving the land on such reasonable conditions, the corporation advances to settlers, having no livestock and equipment, two dollars for every one dollar put up by the settler for these necessities. For the money thus advanced the corporation takes back a five-year chattel mortgage on which only interest is payable for two years, thus leaving the principal to be discharged in the third, fourth and fifth years of the term.

To be acceptable to the corporation, the farmer must have a family or at least be a married man. The corporation is engaged in tracking logs for sale to settlers on five years' credit, thus making it easy for the settler to get a shelter for his family without delay. Where it appears necessary, the corporation advances even food for the family and food for the cattle during the first months of occupation. Supervisors in the employment of the company constantly circulate amongst the settlers, keeping in touch with their needs and giving advice and assistance wherever it is needed for. It will thus be seen that the company offers an exceptional opportunity in (1) the married settler who possesses livestock and equipment and wishes to have a farm of his own; (2) to the married farmer laborer who wishes to become a land owner; and (3) to the married farmer who, owing to his present unfortunate location, has suffered from drought, flood or frost. While the British Dominion Corporation intends later on to extend its operations to other parts of western Canada, it has chosen the fertile section of central Alberta as the scene of its first undertaking. In this area it has become (practically) a desert. It is estimated that there are 150,000 acres of land in this area that is now a desert.

terred sections, half-sections and quarter-sections lying between the Vermilion and Saskatchewan Rivers with the town of Vermilion as the chief distributing point. The rest of the company's holdings are in the Edmonton. Living north from Vermilion through the main east coast, one encounters a series of rolling hills and valleys, the hills grown with verdure and dotted with darker green clumps of trees and brushwood. The landscape is interpreted with much interest and is thus an exceptionally attractive one. The prevailing soil is a black loam with a clay sub-soil. The area is served on the south and north by two lines of the Canadian National Railways. As a result of the influx of settlers the Canadian National Railways is extending its St. Paul de Melis branch across the northern part of the company's property, and the Canadian Pacific is extending its Lloydminster branch towards the west of the company's lands.

English Boy Has Peculiar Skin

Any Marks Show Clearly For Ten or Fifteen Minutes. His unusual skin will always prove means of identification for a bookish schoolboy. The skin appears lighter in color and more sensitive than that of other people, but it has the strange property of being able to retain for ten or fifteen minutes a very peculiar skin which has been slightly stroked by the finger, show definite marks. It was, said, possible to write one's name on the boy's skin and the marks would remain for 10 to 15 minutes. A very slight nudge would show "irreversible results." There were various examinations of this condition, one being that the person suffering from that condition was "one skin short."

Substitute For Glass

Latest Chemical Discovery Is Much More Attractive Than Glass. The latest chemical discovery is a substitute for glass, made from purely organic materials. It seems to be much more attractive, being much stronger than glass, so that it can be worked on a lathe and all sorts of refined shapes. It can be colored for decorative purposes, but the most interesting thing about it is that its refractive index can be varied at will. The material is very valuable for optical instruments and capable of replacing very expensive kinds of glass in telescopes and microscopes. Another interesting optical point is that it appears to be much more transparent than glass to the invisible rays—ultra-violet and infrared light.

Planning Antarctic Flight

Australian Explorer Hopes To Make Continuous Photographic Map. An Antarctic flight is planned by Capt. G. H. Wilkes, who recently returned from an eighteen months' exploration tour in northern Australia. The plan is to explore the coastline from King Edward the Seventh Land, south of New Zealand, to Graham Land, south of Cape Horn. The voyage is a continuous photographic map. He explains that the work is a preliminary to the inauguration of a complete international scheme of Antarctic meteorology. Captain Wilkes, who was one of Australia's official photographers during the war, has distinguished himself by many daring feats.

Will Build Big Flour Mill

Spillers Overseas Limited announce that they will spend \$50,000 in the construction of a flour mill in Calgary, exclusive of machine and other equipment. Work will be started as soon as possible, so P. Lloyd Tynan, managing director states.

Shardian is one of the arts that have never been lost. A system was practiced in Phoenicia before the Greeks existed as a people, and possibly also in Babylon.

Discovers Strange Race

Explorer Finds White Indians in Jungles of Brazil

White Indians who evinced no surprise at seeing a hydroplane or other modern things, although armed with only bows and poison arrows and living now in a primitive state, are among them. Dr. Alexander Hamilton Rice has seen in Brazil.

On his return from his seventh expedition to Brazilian jungles, he told about finding the Indians at the headwaters of the Parana River, 75 miles distant from the headwaters of the Amazon. The faces were streaked with pigment, but they impressed the explorers as being undeniably white. The Indians are understood and speak a distinct language of their own.

"They move in and out between the trees like 'aguas' without making a sound or causing a rustle of the leaves," Dr. Rice said.

They refuse to eat meat and subsist entirely on plants and bananas.

Mistakes in London Statues

Many Peculiar Errors Have Only Been Recently Noted

Peculiar mistakes in London's statues have been commented upon in a recent magazine article which notes the following: "The statue of the Duke of Wellington at the Royal Exchange has neither spurs nor stirrups. Gladstone, in the house, has a seam from one trouser leg, an overcoat button the best trading as a sailor. Cromwell, outside the House of Commons is wearing spurs upside down." And also: "What is the archer decorating the west side of the new County Hall doing with his bow in the wrong hand? Who does the soldier in the war memorial outside the Royal Exchange perpetually offend peace regulations by standing at ease with his hands crossed the top of his rifle barrel? What does the Prince Consort in Holborn Circus, raise his hat in salute? (a thing no self-respecting field marshal

Canada's Fish Day

Association Declares On Last Wednesday in October Of Each Year

By a resolution passed at the concluding session of the annual meeting of the Canadian Fisheries Association, the last Wednesday of October of each year will henceforth be known as Canada's fish day. Previously the annual fish day has been set by the association and selected at times only a few days before, giving little time for districts to prepare for the additional business.

The resolution adopted, orders that co-operation with calendar makers be sought with a view to having the day marked in conformity with other fast days on the calendars of this country.

Another important resolution called for an application to the department of marine and fisheries for the constitution of a separate department to conduct the affairs of the fisheries, with a competent man at its head as deputy minister.

Left Without A Home

John D. Rockefeller, one of the World's Richest Men, Is Now Homeless. Sales by John D. Rockefeller, Sr., of his estates at Pocantico Hills, near Westchester, N.Y., of his town and garage in New York, and of his winter home in Oranget, Fla., to his son, John D. Rockefeller, Jr., for a price in excess of \$1,000,000, was announced recently.

The sale leaves one of the world's wealthiest men without a home of his own.

It also relieves John D. Jr., of the payment of heavy inheritance taxes which would be levied if the son were to come into possession of the homes after his father's death, but a representative of the family denied that the object of the deal was to evade the inheritance tax.

Find Primitive Human Skull

Discovery Of Great Scientific Value Is Made Near Tiberias

In an interesting discovery in view of the anti-evolution fight in the United States, was made recently in a cave at Tiberias, near Tiberias, when a primitive human skull was unearthed among Neanderthal flint deposits. The skull, discovered by a British maker, Sir John Huxley, is of a primitive type, characterized by a prodigious development of the superorbital prominence and depressed forehead in the oblongate. It conforms slightly with the Neanderthal European type, not previously found on the continent of Asia. Prof. Garstank, director of the British School of Archaeology, Jerusalem, who witnessed the discovery, confirmed its scientific value.

Answer To Last Week's Puzzle

Preparing For Eventualities

France to Requisition All Resources In Case of New War

One of the principles of the new national defense plan which Premier Poincaré of France has sent to the Chamber of Deputies is the right to requisition all the country's resources, not only material, but intellectual and scientific. The plan is one of national organization has been prepared by the council of national defense, presided over by M. Boreau, and is designed to outline in advance what can be done automatically if, and when, war is declared, in order to avoid costly mistakes and confusion such as arose in the last war.

The plan deals with the distribution of labor and war materials and prescribes systems for transportation and the manufacture of munitions.

Plan Pageant Of Canada

May Be Held In Montreal In 1927 On Occasion Of Canada's Diamond Jubilee

Plans are being formulated for a pageant of Canada to take place in Montreal in 1927 to commemorate the diamond jubilee of Confederation. It is understood that a number of prominent citizens, including the chief executives of the railways and the banks, are favorable to the scheme, and if plans reach any definite shape the Prince of Wales will be asked to open the pageant.

B.C. Mining

Mining claims in the Stikine district in British Columbia are elated over the fact that there has been struck at a depth of 1,600 feet, as this proves that certain ore bodies in that region go down deeper than hitherto proved.

Regain Civic Improvements

The city of Regina will spend \$250,000 during the year on adding extensions to public works, including the installation of another electric light and power unit, comprising a complete new turbine generator in cost \$120,000.

Snow About 5,000 Years Ago

Scientists say that the snow which was solidified to form the icebergs now floating in the north Atlantic fell in Greenland 5,000 years ago.

Romance of the Spanish Main

CAPTAIN BLOOD

RAFAEL SABATINI

Copyright, 1922, by Rafael Sabatini

Captain Blood, a Viking pirate with a Viking's spirit in the title, and a story of this thrilling story.

CHAPTER XXVIII.—Continued

"You are no longer that," she said, and strove to smile.

"Yet I owe no thanks to you for that," he answered. "I think there is no more to be said, unless I be to add the assurance that Lord Julian Wade has also nothing to say against me. That, no doubt, will be the assurance that your peace of mind requires."

"For your own sake—yes, but for your own sake only," said Lord Julian. "I would not have you do anything mean or dishonouring."

"That and plate though I be?" she clenched her hand, and made a little gesture of despair and impatience.

"Will you never forgive me those words?"

"I'm finding it a trifle hard, I confess. But what does it matter, when all is said?"

Her clear hazel eyes considered him a moment wistfully. Then she put her hand again to her throat.

"I am going, Captain Blood. Since you are so generous to my uncle, I shall be returning to him. I have no more to say to you."

"We are not likely to meet again—ever. It is impossible that we should part friends," said Lord Julian. "I am sorry. Won't you...?"

He took the hand she proffered. Retaining it, he spoke, his eyes so brightly, wistfully considering her.

"Why do you ask me that?" she murmured in quiet fearfulness.

"Sure, now, didn't he give you my message, or did he bungle it?"

"No. He didn't handle it. He gave it to me in your own words. It touched me very deeply. It made me see clearly my error and my injustice. I owe it to you that I should say this by way of answer. I judged too harshly when I was a presumption to judge at all."

He was still holding her hand. "And Lord Julian," he asked, his eyes watching her, bright as sapphires in the copper-coloured light.

"Lord Julian will no doubt be going home to England. There is nothing more for him to do out here."

"Didn't he ask you to go with him?"

"He did. I forgive you the impertinence."

A wild hope leapt to life within him. "And now?"

"Now, when I'm so glad to see you, when I'm so glad to see you."

WORKING GIRL'S EXPERIENCE

Read How She Found Help in Lydia E. Pinkham's Vegetable Compound

Amherst, Ontario.—"I must write and tell you my experience with your medicine. I was working at the factory for three years and became so run-down that I used to take weak pills and would be at home at least one day a week. I was treated by the doctors for months, but it didn't seem to do me any good. I was told to take a rest, but I was unable to, and kept on going worse. I was troubled mostly with my periods. I would sometimes pass three months, and when it came it was so sore and painful that I would have to stop work for a week. I am only 19 years of age and weigh 115 pounds now. I have been taking the Vegetable Compound I was told to take, and I feel much better. I am now able to go to work and I am glad to say that I feel a change. My mother has been taking it for a different ailment and has found it very satisfactory. I am willing to tell friends about it. I would like to answer letters asking about it."

Miss Hazel Bennett, Box 706, Amherst, Ontario.

A day out of week shows in the pay envelope. If you are troubled with such weakness, indicated by a run-down condition, tired feelings, pains and irregularity, let Lydia E. Pinkham's Vegetable Compound help you.

Wallpaper For Eskimos

Moravian Mission Vessel Carried Varied Cargo to Labrador

Labrador to decorate the huts of Indians and Eskimos in the frozen wastes of Labrador was included in the strange medley of goods which the mission ship Harmony took out with her on her latest voyage.

Captain Jackson, her commander, said that, among other commodities he was carrying dolls for the women, churchwardens for the men, and a large quantity of brightly-colored paint, which the Indians are very fond of using for clothes.

Harmony, a tiny vessel of 225 tons, owned by the Moravian Mission to Labrador, is the smallest steamship regularly to cross the Atlantic. Two women, who were going out as missionaries, sailed to sea.

"I am not concerned to hear your reasons," his Lordship interrupted harshly. "I am on the point of sailing and I have not the time. The Governor will hear you and no doubt do justly by you."

He waved to Major Mallard, and Bishop, a crumpled, broken man, allowed himself to be led away.

To Lord Julian, who went with him, expressed himself when Bishop had sufficiently recovered.

"This is one more item to the account of that scoundrel Blood," he said through his teeth. "My God, what a reckoning there will be when we meet!"

Major Mallard turned away his face so that he might conceal his pride without further words led him a prisoner to the Governor's house so that he might be seen by his own residence. He was left to wait under guard in the hall, whilst Major Mallard went ahead to announce him.

Miss Bishop was still with Peter Blood when Major Mallard entered. His announcement startled them both.

"You will be careful with him, Peter. You will spare him all you can for my sake, Peter," she pleaded.

"To be sure I will," said Blood, "but I'm afraid the circumstances won't."

She eased herself, escaping into the garden, and Major Mallard fetched the Colonel.

"His Excellency, the Governor, will see you now," said he, and threw wide the door.

Colonel Bishop staggered in and stood waiting.

He took a seat at a man of whom nothing was visible but the top of a carefully curled, black head. Then this head was raised, and a pair of blue eyes solemnly regarded the prisoner.

Colonel Bishop made a noise in his throat, and stared into the face of His Excellency, the Governor of Jamaica, which was the face of the man he had been hunting in Tortuga to his present use.

The situation was best expressed to Lord Willoughby by Van der Kuylen as the part stepped aboard the Admiralty ship.

"Is it very bad?" he said, his blue eyes twinkling. "Cabin'd blood, you find of blood—your mother dear, I should think, you remember the noble blood of your race?"

The End.

The Family Physician.—The good doctor is always with his fee. He is not it is not always possible to get the best of him. In such cases, common sense suggests the use of reliable remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in relieving tooth pains and healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

A Growing Industry

British Columbia Making Business of Raising Vegetable Seeds

Growing of vegetable seeds is becoming a well recognized business in British Columbia. In 1924 they grew the following quantities of vegetable seeds:

Beans, 10,950 pounds; pole beans, 191 pounds; scarlet runner beans, 691 pounds; broad beans, 1,253 pounds; broccoli, 109 pounds; bush beans, 1,000 pounds; sweet corn, 6,010 pounds; onions, 575 pounds; parsnips, 5 pounds; garden peas, 28,940 pounds; cooking peas, 30,200 pounds; radishes, 498 pounds; mangel seed, 4,002 pounds—M. G. E.

Corn cannot be applied when Holloway's Corn Remover is applied to them, because it goes to the root and kills the growth.

The golden rule should work both ways, but most men who are willing to do as they would be done by want to be done first.

Shepherd brother found in West Africa, one wolf, when full grown, half a pound each.

After Shaving

Mrs. Minard's with sweet oil and apply to the face. Wonderfully soothing.

MINARD'S "KING OF PAIN" LINIMENT

The remains of Bishop's anger faded from him like a cloak. He broke into a sweat of fear. Behind him Lord Julian looked on, his handsome face suddenly white and drawn.

"But, my Lord—" began the Colonel.

Exceptional Offer To Experienced Farmers

Hundreds of Farmers in Western Canada are looking for an opportunity to purchase a farm of their own in the district where

to purchase a farm of their own in the district where the land is fertile and the climate is mild. The British Dominion Land Settlement Corporation is prepared to sell the land in Central Alberta under their new settlement plan.

250,000 ACRES OF GOOD FARMS

The Corporation owns over a quarter of a million acres in the most fertile and best settled area of Western Canada. The land is fertile and the climate is mild. The Corporation is prepared to sell the land in Central Alberta under their new settlement plan.

Disease in Paper Currency

Metal Currency More Sanitary

A famous bacteriologist has declared after careful investigation that metal currency is much more sanitary than paper currency.

It has been in circulation for some time, and was subjected to frequent handling during the hot weather.

Stomach troubles, cholera infantum and diarrhoea, carry off thousands of little ones every summer.

Most cases because the mother does not have a safe medicine at hand to give promptly.

Baby's Own Tablets relieve stomach troubles, or if given occasionally to the well child they will prevent coming on.

They are guaranteed by a government analyst to be absolutely harmless even to the newborn babe.

They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure.

They are sold by all druggists. Write for 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Pity Starving Europe

A dispatch from Belgrade says that the horse d'oeuvre at the leading hotel consists of four pieces of tongue, a slice of ham, three slices of sausage, one sardine, one slice of cold veal, two slices of salmon, half an egg with mayonnaise, a slice of veal loaf, potato and meat salad, radishes, pickles and butter.

After that, one begins on the meal—Detroit Free Press.

Nothing as Good for Asthma. Asthma remedies come and go but every year the sales of the original Dr. J. D. Hough's Asthma Remedy grow larger and greater. No further evidence need be asked of its remarkable merit.

It is always of the same invigorating quality which the sufferer from asthma knows to know. Do not suffer another attack, but get this splendid remedy to day.

Buffaloes Come Back

Because the buffalo has become partly domesticated and has been protected in government parks, the number in the United States has increased to 28,000. Thirty years ago there were not more than 1,000 on the American continent.

Fresh and carefully packed in pure olive oil. Keep a stock in the pantry for easily prepared, enjoyable meals.

MAKING OSCAR SARDINES

THESE BE "PIPING" TIMES

preparing for the winter frosts and thaws. New pipes are needed, and that means expert plumbing. If you entrust all your plumbing work to us you may rely upon getting first-class labor and materials only, and having complete satisfaction with the work when done, at a price to please.

Claresholm Silver Black Fox Ranch

We are offering for sale Silver Black Foxes, same strain as in our pens here, to be delivered next fall. Anyone thinking of buying Foxes, should look our stock over before purchasing. What you want is quality and productiveness. We have both.

A. MCKINNEY & SON,
Breeder of Govt. Registered Foxes,
Claresholm, Alberta.
Agents for Park Hill Silver Black Fox Co. Ltd. Calgary.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Black horse, slightly roan nose, star in forehead, weight about 1350, branded —X— on left shoulder, strayed from Forest Reserve about March 20. Reward for information leading to recovery of same.

T. G. Bratton,
Spring Point, Alta.

BEAUTIFYING A RAILROAD SYSTEM

Strangers, traveling upon the railways in Canada find pleasure in passing through a country that is new and fresh and possessing a wild, primitive grandeur, practically untarnished. But in no small degree this pleasure is heightened and contributed to by a wonderful transformation wrought artificially by the lavish use of trees and flowers which have been planted and cultivated under the supervision of expert horticulturalists employed for the purpose by the railway company.

The most striking example of what can be effected by this means is to be seen along the Canadian Pacific tracks through the Prairie Provinces, according to an article on the subject in the April "Landscape Architecture" by E. L. Chirant.

Along the more than three thousand miles of main line," writes Mr. Chirant, "there were naturally a good many men, station agents, section foremen and others who were garden lovers and who, with the limited means at their command and to the best of their ability, cultivated little pieces of ground about the scenes of their activities. The planting of a little garden at a station, especially in certain bleak, treeless areas, was a conspicuous feature and added some little beauty to the surroundings. This gave to a higher official of the company, about thirty-five years ago, the idea of expanding the work of beautifying the grounds by assisting and encouraging

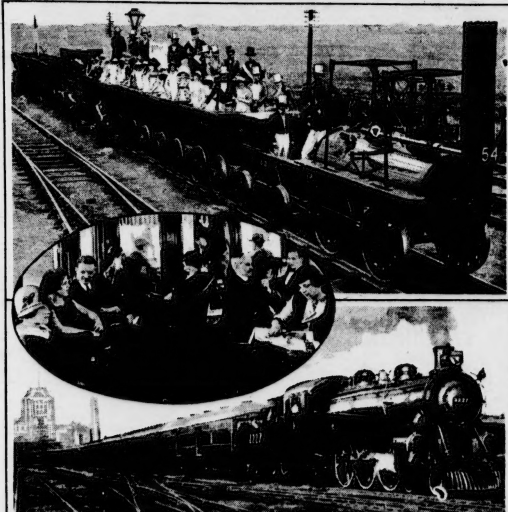

agents and others in this kind. This took concrete form in the distribution to station agents throughout the system of free packets of flower seeds. Inevitably, of course, some men did not bother about them, but sufficient did to produce a very marked effect and make noticeably attractive those stations where the seed had been properly used and cared for.

The impression was so striking that the Operating Department of the company proceeded to have small gardens laid out and planted at some of the principal stations and division points along the system. The result of this again was so impressive that a special study was made of the whole question, and subsequently it was decided to engage in the work thoroughly and systematically and to aid as rapidly as possible the horticulturalist to the staff.

The work since that time (1908) has grown tremendously, each year seeing a number of new gardens laid out about the company's stations until today the Canadian Pacific Railway has the largest number of gardens of any railway company in the world.

"Now along the steel system from coast to coast are a series of fair gardens and spots of green sward and often the cool and refreshing shrubbery about the station constitutes the one cheerful feature of entry into a town otherwise drab and unattractive."

Britain Celebrates Hundred Years of Railroading

The old Stockton and Darlington Railway, in England, is a matter of history now. Its board of directors is no more; its inventor has passed to his reward; its rolling stock, or what survives of it, rests in peace in museums—having served its day and been left behind in the march of progress.

But just a century since the time when the Stockton and Darlington Railway was regarded as a marvellous engineering achievement and threatened the supremacy of the stage coach as a means of long-distance transportation—the ancient engines have been taken down from their pedestals, the wheels oiled, the rust removed and once again high-batted gentlemen and ladies are being conveyed along from Stockton to Darlington behind the first real locomotive.

Thus the people of Great Britain celebrated its railway centenary. Successions of defunct rolling stock, and rolling stock that is almost defunct, illustrated the evolution of railway transportation and gave to the rising generation a glimpse into the

By way of showing the wonderful development that has taken place in railroading since the first engine painfully puffed its way from Darlington to Stockton there is shown above one of the engines used in the centenary celebrations pulling a replica of the original train contrasted with the ultra-modern Trans-Canada Express—Canadian Pacific Train.

By way of conveying its passengers from one part of the Dominion to another, three thousand miles away, at a speed considered unattainable by our forefathers, and in greater comfort and security than many of them enjoyed at home.
